WELCOME TO THE GARDEN!

We are honored that you have chosen to plant your child's early learning journey in our garden. At Flowers in the Garden, we believe every child is a unique flower with the potential to bloom beautifully when given the right care, encouragement, and opportunities to grow.

Our mission is to provide a safe, nurturing, and enriching environment where children develop strong roots, build confidence, and flourish socially, emotionally, physically, and academically. Just as a gardener carefully tends to each flower, our dedicated educators guide and support every child as they grow at their own pace.

We believe that families are a child's first and most important teachers. By working together, we can provide the sunlight, nourishment, and care children need to blossom into confident, school-ready learners.

COMMUNICATION

To help keep families connected to their child's growth, we use the Procure Parent App for communication, attendance, announcements, photos, and important updates sent daily. Please download the app and complete the registration process as soon as possible. Families with children enrolled at both locations may need to use separate email addresses for each site.

FAMILY PARTNERSHIPS

A beautiful garden flourishes when everyone works together. We value strong partnerships with families and encourage participation in family events, conferences, trainings, and activities throughout the year. Your involvement plays an important role in your child's success.

COMMUNITY SUPPORT

We partner with community organizations to help connect families with resources such as speech therapy, occupational therapy, physical therapy, mental health services, and family support programs when needed.

GROWING YOUNG LEARNERS

Through play, exploration, and hands-on learning, we help children grow in the following areas:

- Social-emotional development and self-confidence
- Language, literacy, and communication skills
- Early math, science, and problem-solving abilities
- Physical health and motor development
- Creativity, curiosity, and imagination
- Independence and school readiness skills

Every child has unique strengths and needs. As part of our commitment to helping each child thrive, our [scholarship program](#) includes an intervention component that may provide access to additional support services when appropriate, including Mental and Play Therapy, Counseling, Physical Therapy, Occupational Therapy, and Speech Therapy. Many services accept Medicaid and other insurance plans.

Our goal is to ensure that every child receives the support, encouragement, and resources needed to grow strong roots, blossom with confidence, and be prepared for future success in school and life.

Thank you for choosing Flowers in the Garden Child Development Centers. We look forward to partnering with your family, celebrating your child's milestones, and helping your little flower grow, bloom, and shine.

THANK YOU!
